

The Energy Balance Detoxifying Footbath in Durham, NC.

The human body is like a giant magnet that attracts and holds onto toxins including heavy metals. These ionized toxins attach themselves to joints, organs, arteries, nerves and other tissues disrupting their function.

A remedy for relieving toxic stress on the body is the Energy Balance Detoxifying Footbath (EB 305). This therapy is available to gently cleanse unwanted toxins from the body. The treatment consists of placing the patient's feet into a saline bath to be treated by the EB 305 unit. The unit generates a mix of positive and negative ions in the footbath, which pull toxins out of the body through the skin and into the footbath. One will see color changes in the water during this process, indicating specific organ and tissue cleansing. This procedure also helps to normalize the pH of one's body and aids in balancing acupuncture meridians.

Healthy individuals can expect to feel lighter, more energy, and experience a greater feeling of well-being. Some individuals with pain, edema, gout, headaches, and inflamed joints have reported immediate relief. Others with arthritis, allergies, lymph edema, neuralgia, and other symptoms have experienced relief with multiple treatments.

The average treatment lasts 23 minutes and is only \$30 per session.

Call: The Chiropractic Connection, office of Dr. Joshua Stevens and Dr. Angelina Stevens, sibling chiropractors, at (919)401-5061 for more information and appointment times.
